Azlan Coin (AZC) — Whitepaper

Abstract:
Azlan Coin (AZC) is a community-driven token on BNB Smart Chain focused on building real-world utility and sustainable tokenomics. This whitepaper outlines the token design, distribution, security measures, roadmap, and use-cases.

Tokenomics:
- Total Supply: 10,000,000,000 AZC
- Liquidity Pool: 10%
- Marketing & Partnerships: 10%
- Development & Team: 15% (vesting)
- Reserve: 15%
- Airdrops & Rewards: 5%
- Founder Holding: 45%

Security: Liquidity lock, contract verification, and audits are recommended to ensure trust.

Roadmap & Use-cases:
- Phase 1: Deploy contract, website, initial liquidity
- Phase 2: Community growth, listings, staking
- Phase 3: Partnerships and real-world tokenized services
- Phase 4: CEX listing and wider integration
